**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 5-15 rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

The limitations such as a portable fire fighting monitor, a pivot inlet joint, a ball, coaxial trunnions, first ball, second ball, first axis, second axis, one way brake of claims 5-15 can be found in the cancelled claims 1-5, 8, 9, 12-14 of the original application 09/516,076.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 5, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Trapp.

Trapp discloses a portable fire-fighting monitor comprising a housing 86, a hose 72 at a pivoting inlet joint 72 pivotable about a horizontal axis.

4. Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Schnipke (U.S. Patent No. 4,697,742).

Schnipke discloses a portable fire fighting having a pivoting outlet comprising a ball and socket 10, a one-way brake 702, and a coaxial trunnions 23a.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7-11, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trapp in view of Gillick (U.S. Patent No. 1,665,810).

Trapp teaches all the limitations of the claims except for a ball and socket pivotable about an axis. However, Gillick discloses a first ball 16 and socket 9, a second ball 16 and socket 10, a first axis of lug 22 oriented at a right angle to a second axis of

Art Unit: 3752

another lug 22 as shown in figure 1. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Trapp with a ball and socket pivotable about an axis as suggested by Gillick. Doing so would provide a flexible coupling (see page 1, lines 5+).

7. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Trapp in view of Gillick as applied to claims 7-11, 13 above, and further in view of Schnipke.

Trapp in view of Gillick teaches all the limitations of the claims except for a one-way brake. However, Schnipke discloses a portable fire fighting having a pivoting outlet comprising a ball and socket 10, a one-way brake 702. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Trapp and Gillick with a one-way brake as suggested by Schnipke. Doing so would provide a way to prevent unwanted movement of the nozzle.

#### ***Allowable Subject Matter***

8. Claims 1-4 are allowed.

#### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a portable fire-fighting monitor: Roser, and Miscovich.
